

THX 100

Monopolar X-ray tubes

New

- Water-cooled anode
- 100 kV operating voltage
- High-power emission
- Compact and easy plug-in
- Robust design for long life expectancy
- Fully compatible with most generators

THX 100

The THX 100 X-ray monopolar tubes are based on Thales advanced metal-ceramic technology. The ceramic's dielectric strength provides a high reliability and a long life expectancy within a compact and light design to facilitate OEM integration.

Featuring a water-cooled anode and a tungsten cathode with direct heating, THX 100 tubes generate high-energy X-rays (450 - 3 000 W) with various focal spots from 0.2 to 5.5 mm.

Typical applications include in-line food inspection, continuous gauging, non-destructive testing, baggage screening and explosive detection systems.

All these products are designed, developed and manufactured at an ISO 9001:V2000 and ISO 14001 certified production facility.

Reference	THX 100 1055	THX 100 1030	THX 100 0510
